## PAPER

### SILVERADO PHOTO PAPER DIGITAL FOR HP INDIGO®

Environmentally-friendly ECF paper board, certified FSC®, developed for digital photographic printing. Double blade coated on top surface. The velvety touch on the reverse surface is obtained without any plastic lamination or extrusion. Silverado's superior stiffness creates the same sensations as traditional Silver Halide paper. Excellent Brightness and reliable printability ensure amazing results with HP Indigo® digital printing, as well as toner-based and offset printing. Personalized lamination can be applied post-printing on the front side. This means the preferred finishing can be chosen for each photo -such as Gloss, Matt or Embossed- at the same time as adding further protection to the print.

#### DESCRIPTION

SIZE	GRAIN	SUBSTANCE
46,4X32	SG	225
53X75	LG	225
